

Introducing the NICVIEW® 2 Live Video Streaming Camera System

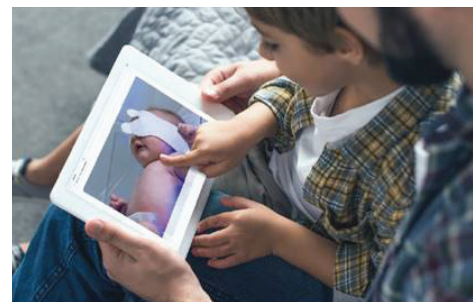

We are the only hospital in South Palm Beach County and North Broward with the NICView cameras.

Placing Families at the Center of their Newborn's Care

When your new bundle of joy requires extra special medical care in our NICU, you might feel overwhelmed. At West Boca Medical Center, our goal is to relieve your fears and take good care of your premature or at-risk baby.

While many babies in the NICU are released home within a few days, some will need to stay longer. Since you and your family members cannot be by your baby's side at all times, we have installed the NICVIEW® 2 Live Video Streaming Camera System in our NICU. This password-protected camera provides you and your family members a virtual window to your newborn in the NICU 24 hours a day, 7 days a week.

Benefits of NICVIEW® 2:

- On-Demand HD Quality Video Streaming
- Encrypted, Password Protected Software
- Available 24/7
